WORK EXPERIENCE

Noblesoft Technologies, Brazil — *Software Engineer*

2021 to Present

Developed and implemented medical sales apps projects to Health international companies, from initial concept to completion. Using React, Material UI, Apexcharts and Devexpress as main libraries.

- Created and maintained a Material UI based library aiming to reduce the engineer cost per project.
- I was part of the team responsible for developing a medical sales interface to analyze Health data from all USA.

SYSMAP, Brazil — *Software Developer*

2019 - 2021

I worked as a consultant for companies linked to telecommunications, cosmetics and banking industries, developing and maintaining web applications and interfaces.

- Created a hierarchical mapping app to help board and directors to manage companies structures and resources, allowing managers to better define the scope of resources applied to develop applications and delivery projects.

IBM, Brazil— *Mobile Developer*

2018 - 2019

Worked in the consultant branch of IBM creating mobile apps with React Native for retail companies.

- I was part of the team responsible for implementing mobile applications to allow consumers to buy products without cash and cashiers, reducing maintenance cost of stores.

EDUCATION
